## CENERAL XNTELSECRETGENCY

179 74 42

8.	The Mongolian National Army, commanded by Marshal Choibelsan with Lieutenant General Pogodayev, Chief-of-Staff, contains the following units	25X1
٠	lst Infantry Division 2nd Infantry Division	
	3rd Cavalry Division, reformed from cavalry brigades	
•	lst Mechanized Division (Soviet) 2nd Mechanized Division (Soviet)	

- 9. The 56th, 57th, 58th, 59th, 60th, 61st, and 62nd Units of the Frontier Guard Troops (MTD) were transferred to the direct command of the Soviet Army on 1 February 1948.
- 10. In March 1948, the Soviet Government ordered the demobilization of "senior ego-groups" in the Soviet Army. However, this decree did not effect the officers and non-commissioned officers of the First Far Rastern Army or personnel of technical or special units of the First Far Rastern Army. New recruits have replaced those troops which were demobilized, while about 60 percent of the demobilized troops have been "voluntarily" attached to the sovkhozes and military establishments in the Primorskaya and Khabarovskaya region (oblast) and can be re-mobilized in a very short time.
- 11. The Birsky ( Bira/1902'N, 132028'E) Machine Construction Plant, the Komsomolak Machine Construction Plant, the Khabarovsky Machine Construction Plant, Dalsavod and many other establishments are manufacturing military materials exclusively, and the First Far Eastern Army is now entirely independent of military supplies from weatern Russia.
- 12. The Pacific Floot has also expanded and three or four Nerpa type submarines, which are manufactured at Dalzavod, join the Pacific Floot monthly. The Coast Guard Floot has been reinforced by an undetermined number of torpedo boats and Shehuka type submarines.
- 13. The air strength of the Eastern Front, including first and second line planes, is approximately 5,000 (?) planes. Air bases are being constructed in the northern regions of Eastern Siberia.
- 14. The Soviet population of Viadivostok, Vorosbilev, Khabarovsk, and other large cities in southeastern Siberia regularly receive anti-air attack training and air-raid drills.
- 15. The Soviet Army has completed fortifications on Uruppu-to, Eterofu-jima, Kumashiri-shima, and Paramehiru-to in the Kurile Island group. The 56th Mariupolak Division, the 2nd Amphibian Brigade and part of the 4th Tank Division, under the over-all command of Major General Levashev, are stationed in the Kurile Islands.
- 16. The lot Marine Brigade is stationed at Olsa (43043°N. 135019°E). Units of the 2nd and 3rd Marine Brigades are in the region between Bochkarevo (50057°N. 128029°E) and Sysbodny (51023°N. 128009°E). Some thats of the 18th Gorps moved to the east of the Novekiyevakiyeval (51040°N, 128054°E)-Spassk (14037°N, 132049°E) rail line. The headquarters of the 18th Gorps is at Yoroshilov. The Headquarters of the 19th Gorps has been transferred to Krasnayarechka (61050°N, 152060°E):

  units of the 19th Gorps have been moved north of the Imaa River 25X1
- 17. Licutement General P. T. Luknebin, who has been appointed commander of the air arm of the Eastern Front, inspected air units of the First Far Eastern Army in August 1948.

25X1

18. Colonel General Naksimov, Commander of the First Far Eastern Army, left for Sverdlevek in July 1948 for a conference with Marshal Zhukov, Marshal Rokossovsky, Colonel General Dekhtyerev, and other military leaders.
